new wave
WORKSPACE

One App

Your modular, flexible workspace platform.

Solution Overview

Floor plans and wayfinding

Your building, in 2D, 3D and on foot

Show the way New

A walking route to your space, across floors and around furniture, step-free when you need it.

See what's free New

Move through the day and watch rooms and desks change status on the plan.

Built by your own team New

Draw walls and zones, furnish from a model library, import your drawings.

Centralised Room Bookings, Catering and Services MODULES

Centrally managed rooms, with set-up and teardown in view

Requests in, rooms assigned

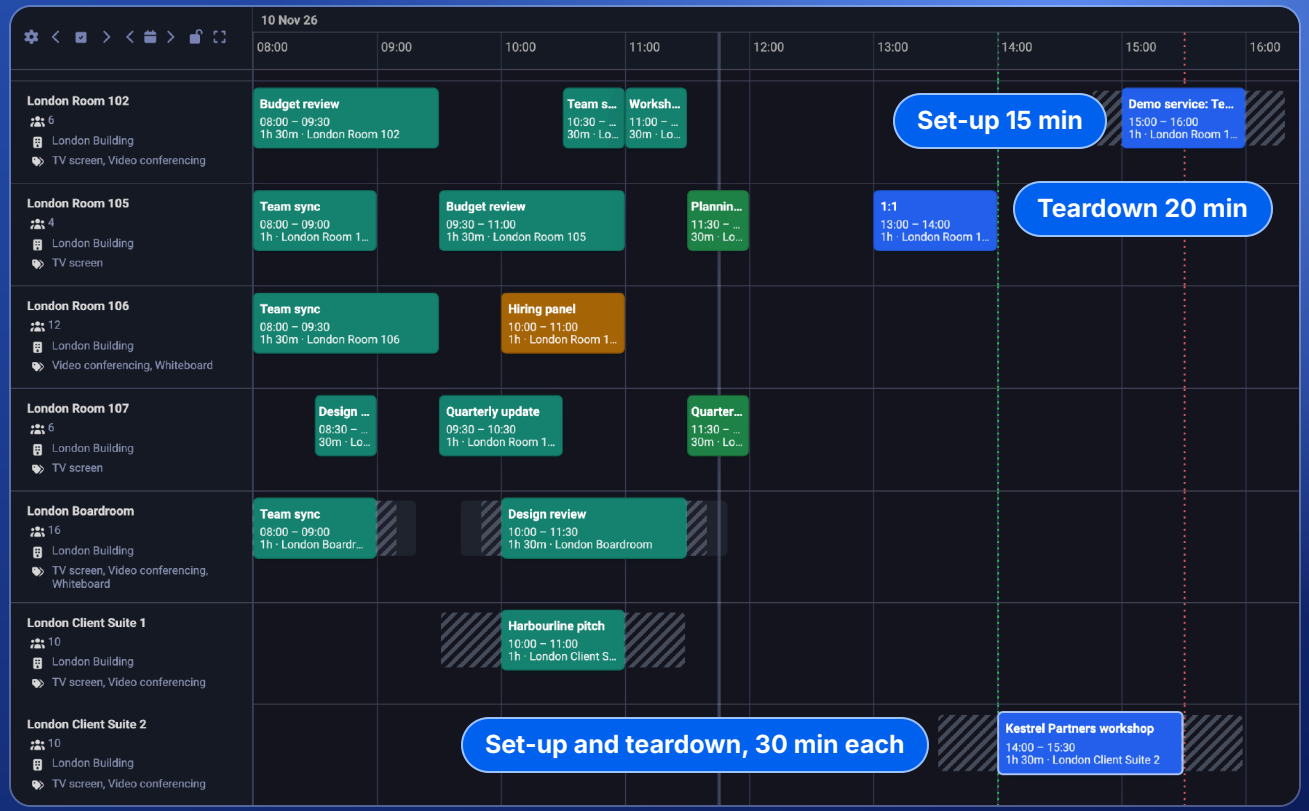

Secretaries raise requests. Reception drags them onto the timeline to set the room and time.

Set-up and teardown on every booking New

Hatched bands show the time each room needs either side, and bookings snap clear of them.

Catering and services add their time New

Catering or AV set-up blocks the room wherever it runs outside the meeting.

Checked out Checked in No-show Booked

The bookings timeline in One App, on demo data.

Smart Analytics MODULE

Real-Time Analytics

Decisions backed by how the workplace is really used

Utilisation

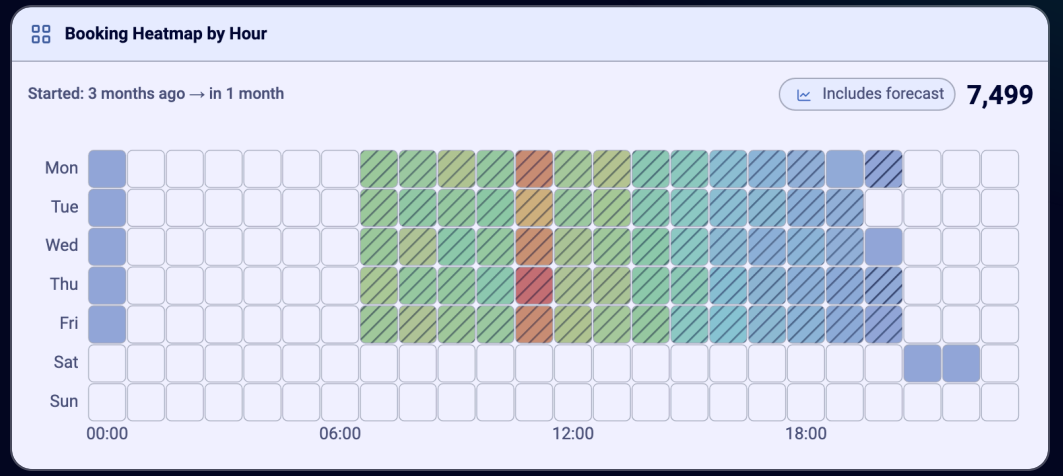

How every space is used, week by week, and what sits behind each figure.

Demand New

What people asked for and didn't get, with the cause of each refusal.

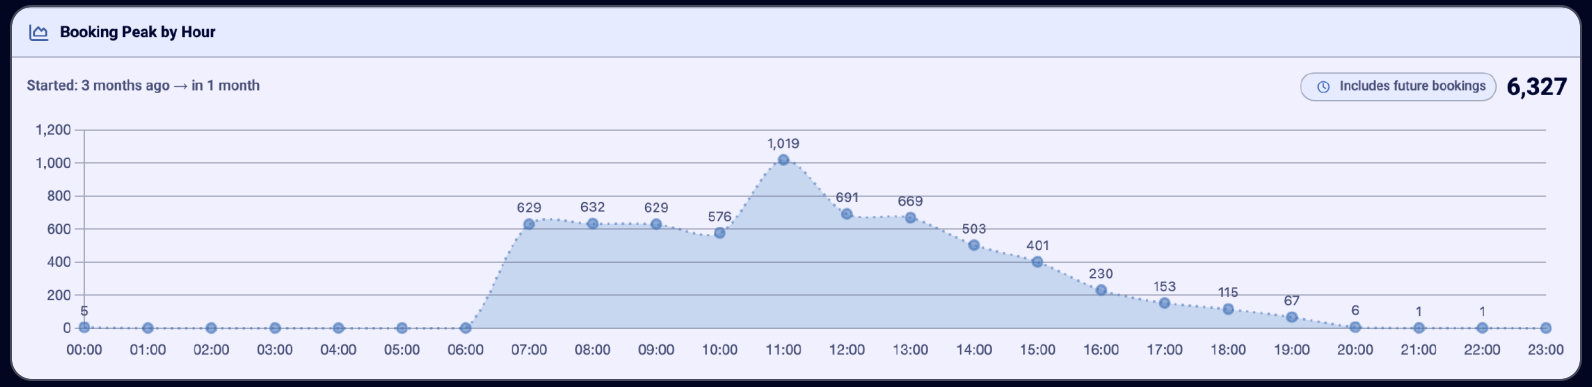

ESG

CO2, energy, water, air quality and waste, for each person and the company.

ESG, personal and corporate

CO2, electricity, water, indoor air and waste, alongside diversity, safety and governance.

Real dashboard widgets on demo data.

Accessibility

Accessible to everyone who works with you

For large organisations, accessibility is often a requirement. One App is built for it from the start.

Built to WCAG 2.1 AA New

Everyday self-service screens are built and automatically tested against WCAG 2.1 AA, with more than 1,000 automated checks.

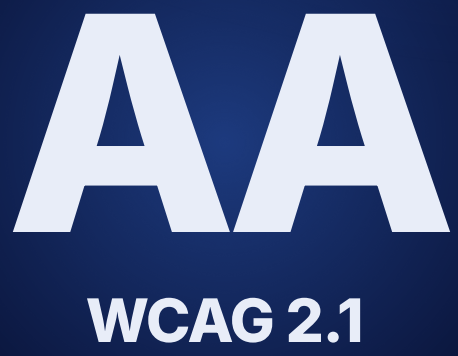

Readable for everyone New

Colours are contrast-checked, and a text size setting scales the whole app.

Keyboard, screen readers and step-free routes New

Dialogs keep keyboard focus in the right place, controls announce themselves, and routes avoid stairs on request.

Built and tested against

Matters to Human Resources IT Corporate Real Estate

One App

In your hands, wherever you work

Install it on any device New

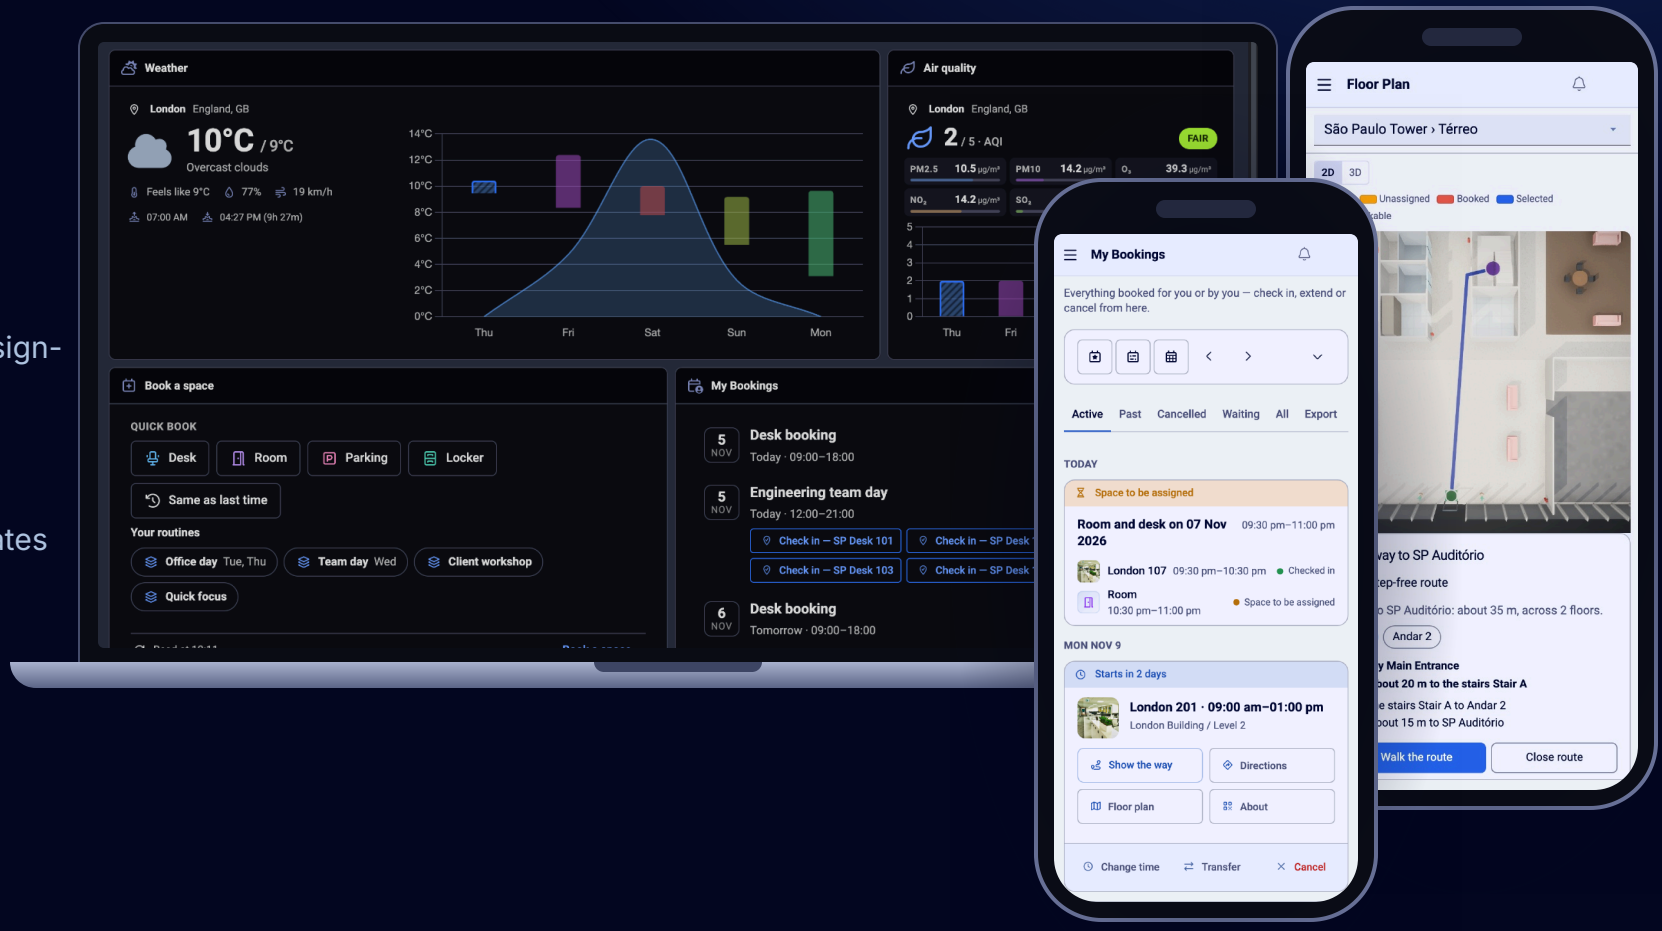

iPhone or Android, from the browser. Reservations stay readable offline.

Inside Microsoft Teams New

Open One App as a Teams tab with single sign-on.

A home page for each person

Dashboards built from widgets, with templates for each group.

Value across the organisation

Everyone benefits from One App

CEO

Productivity, communication, sustainability reporting

One platform for the whole workforce, targeted messages and a single ESG view.

CHRO

Culture, productivity, employee experience

Teams that book together, sit near each other and can see who's in.

Human Resources

Diverse workforce, happiness, wellness

Fair rules for every group, step-free routes and well-being checklists.

Front of House / EA

Catering approval, room scheduling, communication

Book for others, order catering with the room, and run visitors and check-ins live.

Employee

Collaboration, productivity, networking

Book a whole day in one go, sit with colleagues and get walked to the space.

Facility Manager

Insightful data, occupier feedback, right-sized offices

Utilisation and demand reports, one ticket queue, and closures that move bookings.

Corporate Real Estate

Crowd control, real estate data, employee safety

Capacity and eligibility rules, evidence for space decisions and targeted safety alerts.

Information Technology

Robust architecture, integration, easy to run

SaaS on AWS, Microsoft sign-in, integrations in place of mini apps, and tested config.

Finance

Business unit support, purchase justification, occupancy insight

Fewer licences, unused space released, and evidence of what space is really needed.

Workplace policies

More with less

Use One App's configurability to match your return-to-office policies, so the office earns the commute in the modern workplace.

Your RtO rules, built in New

Decide who may use which spaces, by group, on every route into booking.

Fair when demand peaks New

Quotas, strikes and fair draws share the busiest days fairly.

The best space, automatically New

Allocation weighs walking distance, fit and sitting near the team.

Planner

One booking for the whole day

Easily plan your visit to the office, with every resource you need, for you or for your team.

Room, desk, locker and parking together New

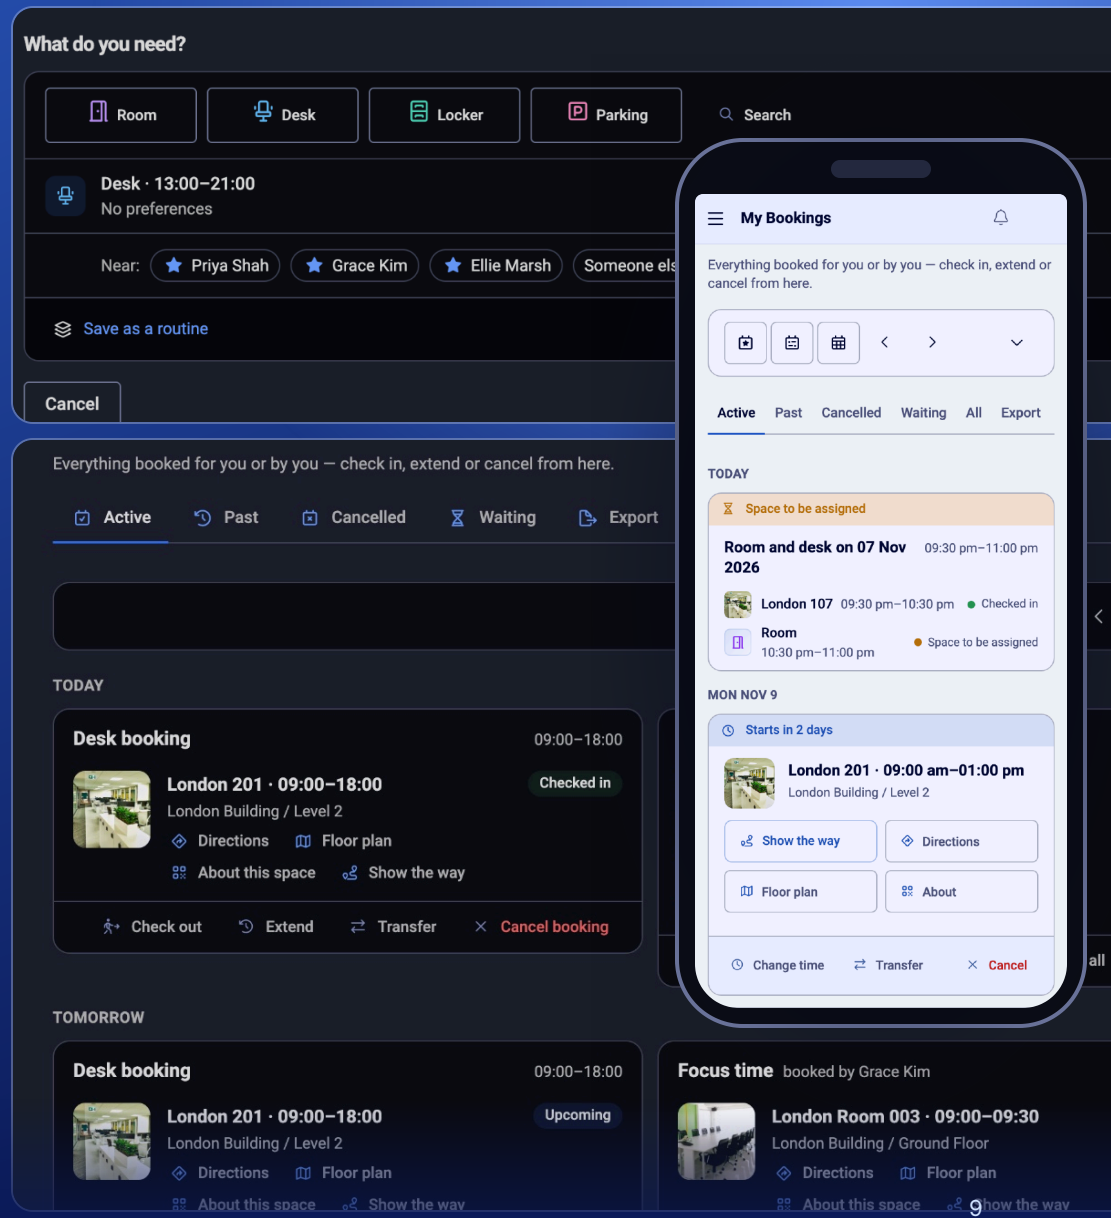

Each item in the same booking keeps its own times.

Several days, repeats and routines New

Book up to 10 days at once, or save a routine like "Office day".

For you or your team New

Book for someone else, or book a block together and offer the seats.

Check-in and release

Manageable flexibility

Booked space gets used, or goes back for someone else.

Check in, or the space returns New

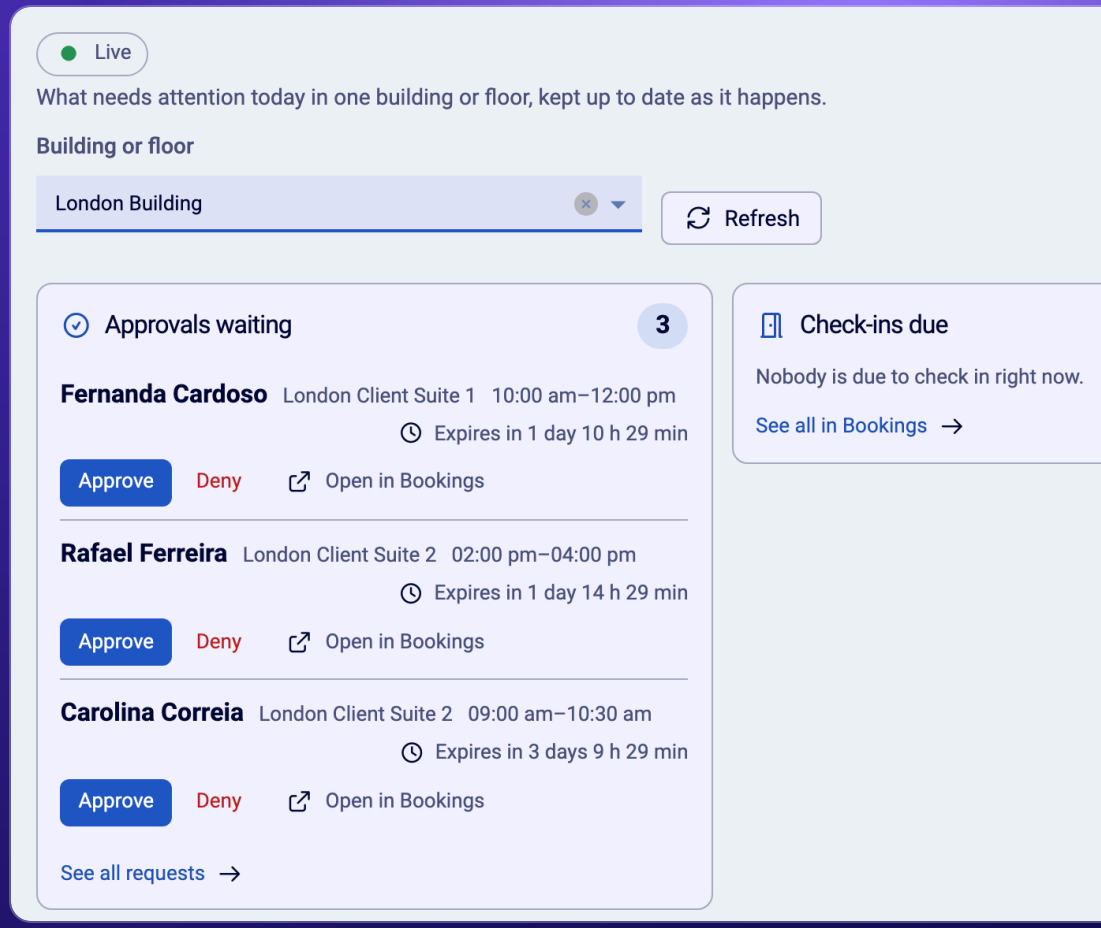

Check in by QR or app. Unclaimed space goes back automatically.

Waiting queues New

Join a queue and get an offer when space frees up.

A live view for your team New

Approvals, check-ins due and releases for a building or floor.

Parking Management MODULE

Parking, handled like any other space

Bays or zones New

Book a numbered bay, or a place in a zone with a set capacity.

Vehicles and plate rules New

Register vehicles once, and apply local rules such as rotation by plate.

EV charging New

Match charging bays to electric vehicles and limit charge cycles.

Free Booked, with the vehicle on the bay

The car park floor plan in One App, on demo data.

Digital Services Catalogue MODULE

One front door for every workplace service

People ask in one place. Service teams work from one queue.

Visitor Management System

Pre-register guests, contactless check-in, badges and host alerts.

Catering

Order with the room and route it for approval and delivery.

Mailroom

Log parcels, notify people and record collection.

Services catalogue

Your own forms and workflows for any provider.

Ticket tracker

Every request tracked to done, on one board.

Matters to Front of House / EA Facility Manager Human Resources

Integration DNA MODULE

Secure, integrated and easy to run

Fits what you already run

Video conferencing, access control, building systems, smart lockers, ITSM and IoT sensors.

Secure by design

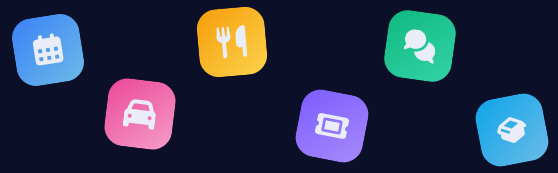

AWS in your choice of region, in ISO 27001 and SOC certified data centres, with Microsoft sign-in.

Privacy and control New

A data register, erasure and retention controls, and tested configuration changes.

The problem we solve

Workplaces run on too many apps, or on no process at all

Too many mini apps

Each team buys its own tool. Data splits, security standards vary, licences add up, and people stop installing yet another app on their phone.

- ✕ Fragmentation
- ✕ Security risk
- ✕ Hidden cost
- ✕ User frustration
- ✕ Duplicated effort

Manual process

Paper forms, email chains and spreadsheets are slow, easy to get wrong and hard to track. Nobody can say who did what, or whether it was done.

- ✕ Paper based
- ✕ Non-existent process
- ✕ Inconsistent workflows
- ✕ Little accountability
- ✕ No usable data

One App

Everything your people need from the workplace, in a single place they already know how to use.

- ✓ One App to learn and use
- ✓ One App to manage
- ✓ One App for insights

One App at a glance

Everything your workplace needs, in one place

Book

- Meeting rooms
- Desks
- Lockers
- Parking
- Whole-day booking New
- Flexible times New
- Team bookings New
- Walk-up by QR New
- Centrally managed rooms
- Multi-location, multi-time-zone

Find

- 2D and 3D floor plans New
- Show the way New
- Step-free routes New
- Sit near colleagues New
- Who's in New
- Space search New
- Find colleagues and first aiders

Govern

- Workplace policies
- Eligibility by group New
- Automatic allocation New
- Quotas and strikes New
- Check-in and auto-release New
- Waiting queues New
- Live ops console New

Serve

- Visitor management
- Catering
- Mailroom
- Service catalogue
- Ticket tracker
- Digital checklists
- Targeted communication
- Timesheets, travel, reimbursement

Know

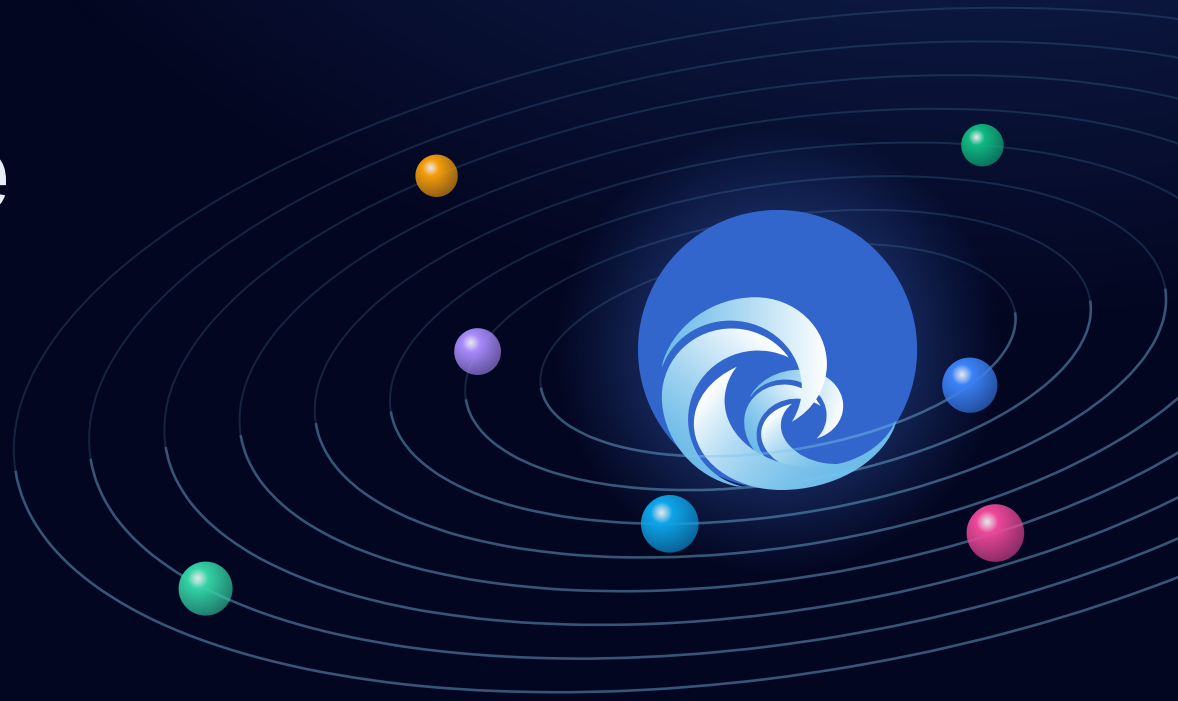

- Smart analytics
- ESG dashboard
- IoT and Microsoft Graph insights
- Demand reports New
- No-show reports New
- Replay rule changes New

Used from web, phone, Microsoft Teams, desk devices and QR labels, in six languages.
